

EUROPEAN GREEN DEAL FOR TRANSPORT

EU 2011 CO₂ Reduction Target for Transport: 60% reduction between 1990 and 2050

Reduction in carbon intensity needed to achieve target in freight transport sector

FACTOR
6

83% reduction in
CO₂ / tonne-km

New EU Commission wants to boost the EU 2030 GHG emission reduction target to 50-55%, up from the current 40%.

TRANSPORT MUST DELIVER ITS SHARE EVEN SWIFTER

Most cost-effective **transport decarbonisation solutions** must be found to accommodate the growing freight transport demand and emissions, **WITHOUT CURBING MOBILITY**
