

Portmade Group

Barcelona
24 November 2017

Portmade Customs NV

- Benelux service provider
- Customs Im/Ex/Transit
- +1 mio declarations
- Logistic Service Providers
- Industry

Pionira NV

- Social Enterprise Platform
- E-CMR

Portmade NV

- other declarations
 - Veterinary
 - Phyto sanitary
 - Dangerous cargoes

Port@pp NV

- Building apps for biz
- Depending on demand
- data retrieved from anywhere

Obstacle 1 :

Before 1/5/2016 (pre UCC)

- transactional basis
- just in time declarations
- selection for scanning or customs visit

Solution :

After 1/5/2016 (UCC)

- Disconnecting declaration and physical move
- System based approach by customs
- deferment of customs visit to destination
- on line access for customs

Obstacle 2 :

Digitization versus digitalization

Solution :

Xynaps Social Enterprise Data Platform

Input

- hard copy documents
- 'Standard' old school EDI messages

output

- any other format
- BI enriched (IOT)

Obstacle 3 :

Representation in all Member States

Solution :

Customs Competence Center (CCC)

- Choice of Member State
 - facilitation by customs
 - company tax issues
 - real estate market
 - jurisdiction
 - availability of competence
- Centralized Clearance

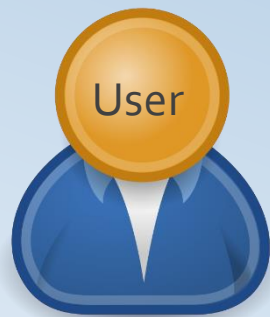

Why to go digital ?

Optimization :

- Necessity of cargo availability at destination
- Availability of empty transport (unlike mode of transport) per location
- Availability of cargo/shipment per location
- Carbon footprint per transaction
- Density of traffic per mode of transport (actual)

Advantages :

- Visibility (actual data)
- Predictability (historic data)
- Communication with all partner simultaneously
